Art Unit: 1654

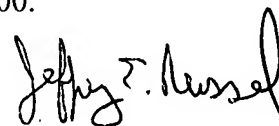

1. The Sequence Listing filed September 17, 2007 is approved.
2. The following is an examiner's statement of reasons for allowance: The claimed invention is deemed allowable over the prior art of record or any combination thereof. With respect to instant claim 57, the claim is entitled under 35 U.S.C. 119(e) to the benefit of the filing date of provisional application 60/412,081, and therefore the Fu dissertation and the Aucoin oral presentation are not prior art under 35 U.S.C. 102 against the claim. With respect to the Fu et al article (Organic Letters, Vol. 4, pages 237-240) and its disclosure of the peptide recited in instant claim 57, the declaration by Hammer filed September 17, 2007 shows that the peptide was not "by others", and the Fu et al article's disclosure of the peptide is therefore not available as prior art against the claim under 35 U.S.C. 102(a). With respect to instant claims 58 and 60, the Fu dissertation's disclosure of the peptide which it designates "AMY-2" is not prior art under 35 U.S.C. 102(a) against the claims, because the Hammer declaration filed September 17, 2007 shows that the peptide is not "by others". With respect to instant claims 58 and 59, the Aucoin oral presentation's disclosure of the peptide which it designates "AMY-3" is not prior art under 35 U.S.C. 102(a) against the claims, because the Hammer declaration filed September 17, 2007 shows that the peptide is not "by others".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
